# Reading Toolkit: Grade 4 Objective 2.A.3.a

## Standard 2.0 Comprehension of Informational Text

Topic A. Comprehension of Informational Text

Indicator 3. Develop knowledge of organizational structure of informational text to understand what is read

Objective a. Identify and analyze the organizational patterns of texts

Assessment Limits:

Sequential and chronological order

Sequential and chronological order

Cause/effect

Cause/effect

Problem/solution

## Lesson Seeds Reading Grade 4 Objective 2.A.3.a

#### Activities

- The teacher should divide the class into small groups and provide each group with a folder containing an informational text cut into paragraphs. Through sharing and discussion students within each group should correctly organize the text, and then identify the text structure as main idea/supporting details, sequential etc. Each group should present their text to the class explaining how they determined the structure. Teacher Note: It may be necessary to model a passage with the class.
- After instructing students in multiple organizational patterns, the teacher should place the class into teams. On the board designate areas representing each of the organizational patterns. Give each team five paragraphs in individual envelopes. As the game begins, each team should read each paragraph, determine its organizational pattern, and send a runner to the board to place the paragraph in its correct area. Once each team has finished its paragraphs, review each designated area to ensure correct responses. Incorrect responses should be adjusted. If each team has the same five paragraphs, use a different color paper for each team. The first team to correctly identify the organizational pattern of each paragraph is the winner.
- After students have been exposed to using multiple organizational patterns, the teacher
  will select passages for the students to read that clearly demonstrate the use of specific
  organizational patterns. On sentence strips list the following: sequential or chronological
  order, cause/effect, problem/solution, similarities/differences, description, main idea and
  supporting details, transition/signal words. The students will read the informational text
  and label each text according to its organization. As a group students will share their
  work and make necessary corrections.
- Students will be asked to read an assigned informational text. As students read the selections, they will write the name of the selections read under the proper heading that describes how the text is organized.

Chronological Order	Cause and Effect	Compare and Contrast	Proposition and Support

As students read selections they should realize that authors of informational text often use more than one pattern in a selection. Working with a partner, students will compare their understanding of text organization. Students will then discuss whether or not the author used/did not use the most effective organization or whether or not another type of organization might enhance the existing text.

### Clarification

### Reading Grade 4 Indicator 2.A.3

To show proficiency of the skills stated in this indicator, a reader will show an understanding of the patterns in a text, which are its organizational structures. Using text features will assist a reader in determining the type of organization used. As the complexity of a text increases, a reader will advance from identifying of organizational structures to analyzing how the organizational structure helps create meaning.

The ability to identify and analyze the organization of a text is a necessary step to comprehension of an entire text. To determine the organizational structure of a text, a reader must first identify its subject or topic and survey its print features and graphic aids. There are diverse informational texts---essays, speeches, biographies, autobiographies, newspapers, magazines, and multiple types of real-world texts. The purpose of each of these text types governs its organizational structure. A narrative nonfiction text tells a true story so the organization would be sequential or chronological. An editorial often attempts to convince a reader to believe as the writer does. A standard organization for an editorial is information by degree of importance. Paying attention to how writing is organized offers a reader an efficient way to access information and to see the relationship among the elements of the text.

Knowledge and use of words and phrases commonly used in organizational patterns is essential to determining and analyzing a text structure. In order to do this, a reader must be able to locate within a text the words that signal organizational patterns. When this is accomplished, a reader can explain and analyze the contribution of the organizational plan to understand the meaning of an entire text. For example,

- Words such as first, second, and third show a chronology.
- Next, then and finally show a sequential order.
- Above, beneath, next to, and beside show a spatial order or description.
- Because and as a result of are words that signal a cause/effect relationship.

The words above indicate a movement in the text that may be a passage of time, a shift from one location to another or a relationship among ideas. Reading critically means constructing meaning from a text and evaluating what that text has to say. A critical reader can locate these transitional devices, combine them with prior knowledge of similar text and determine a purpose for the whole text. Furthermore, a critical reader can determine whether an organizational pattern is the best way to present information in a text. For example, an author may wish to make a point about a selected topic. A critical reader can make a judgment about the choice an author makes in the organization of his/her text.

For more complex texts, a critical reader can determine through knowledge of transitional devices a shift to indicate a change in organizational pattern. An author may introduce an essay with an anecdote organized in a chronological pattern but may then move into a problem solution pattern to continue. A critical reader can note the words that signal a chronological pattern and detect the change to words that signal the problem solution pattern, thereby understanding that the structure of the text has shifted. Since pattern and author's purpose work together, a critical reader may then ascertain dual purposes within a text.

As readers have more experiences with various patterns of text and the words that signal them, readers can use those organizational patterns to locate specific information. A

practiced reader will look for a text pattern using those words that signal patterns and indicate shifts in patterns and then use all of these elements to access specific text details that will support an interpretation and evaluation of a text.

## Handout(s):

· Chinese Almond Cookies

## Reading Grade 4 Objective 2.A.3.a

Read "Chinese Almond Cookies" and answer the following question. In what order are the numbered steps arranged?

- A. In the order in which the author remembered them
- B. From the simplest to the most difficult
- C. From the most to the least time-consuming
- D. In the order in which they should be followed

#### Correct Answer:

D

### Handouts

## Chinese Almond Cookies

By David C. King

Each region of China has its own special style of cooking. When Chinese immigrants began arriving in the United States in the mid-1800s, they brought with them many of the delicious recipes from their homeland. Some of the immigrants established restaurants and bakeries. Chinese food soon became popular throughout the country. In traditional Chinese cooking, the main meal of the day would usually include fruit for dessert. Sweets, like the tasty cookies you'll make in this recipe, were usually served with afternoon tea.

#### **INGREDIENTS**

1/4 pound butter or vegetable shortening, softened

3/4 cup sugar

1 egg

1/2 teaspoon vanilla

1 tablespoon whole milk or light cream

11/4 cups all-purpose flour

dash of salt (about 1/8 teaspoon)

1/4 teaspoon baking powder

3/4 teaspoon almond extract (available in the

spice section of supermarkets)

36 blanched almond halves or 18 whole almonds

cut in half

### **EQUIPMENT**

measuring cup measuring spoons

2 medium-size mixing bowls

wooden mixing spoon

eggbeater

2 cookie sheets

paring knife (to be used by an adult for

cutting whole almonds)

teaspoon

adult helper

YIELDS about 3 dozen cookies

#### **STEPS**

- 1. Preheat the oven to 350°F.
- 2. Place the softened butter in a mixing bowl and stir it well with a mixing spoon to make it creamy. If you use vegetable shortening, you won't need to stir it much.
- 3. Add the sugar to the butter or shortening, a little at a time. As you add the sugar, stir constantly. Keep stirring until the mixture lightens in color.
- 4. Add the egg, vanilla, and milk or cream. Beat the mixture well with an eggbeater until all the ingredients are blended.
- 5. Place the flour, salt, and baking powder in the other mixing bowl. Stir the mixture with a clean, dry spoon.
- 6. Add the flour mixture to the first mixture, a little at a time, stirring constantly.
- 7. Add the almond extract and mix the ingredients well with the eggbeater.
- 8. Using one slightly rounded teaspoon for each cookie, place the dough on ungreased cookie sheets. Flatten each cookie a little with the spoon and allow about an inch of space between them.
- 9. Press a half almond onto the center of each cookie. If you use whole almonds, ask your adult helper to cut them in half the long way with a paring knife.
- 10. With the adult's help, bake the cookies for 8 to 10 minutes. Check the cookies frequently. They're done when they turn golden brown.
